

Index

(Page numbers in *italics* indicate material in tables or figures.)

Achievement tests, individually administered, 157-58
 Acoustic information to perceive and identify familiar speech stimuli, 178
 Aggressiveness, misinterpreting high intellectual energy as, 8-9
 Ahlbom, A., 23-24
 Allergic illnesses, 20, 21; dyslexics and, 25-28
 Alphabetic phonics, research project utilizing, 81-96
 Alphabetic principle: differences in ease of grasping, 66; learning to read and, 54, 58, 72
 Alphabets, age of, 55
 Anderson, T. H., 205
 Annett, M., 23
 Aptitude-achievement discrepancy, 123
 Armbruster, B. B., 204
 Articulatory gestures, 59
 Association on Handicapped Student Service Programs in Postsecondary Education, 121
 Auditory discrimination: fine-grained, 171-77; language learning and, 177
 Auditory evoked response, 157, 164
 Auditory processing: investigations of, 171; language learning and, 170-71
 Autoimmune illnesses, 20, 21; autotoxic antibodies in absence of clinical, 31; dyslexia and, 25, 28-29; left handedness and, 24; maternal, 29-32
 Autoimmune mice, Geschwind hypothesis and study of, 33
 Autotoxic antibodies, damage to fetal tissue from maternal, 30
 Backward readers, 153. *See also* Dyslexics; Reading disabled (RD) children
 Bodian, N. A., 154
 Beers, J. W., 139
 Behand, Peter, 20, 21, 23

Benton, A. L., 166
 Benton Finger Localization Test. *See* Finder location test
 Blonds, non-righthandedness in, 22-23
 Boston Naming Test, 66
 Bowler, Rosemary F., ix-xii
 Bradley, L., 65
 Brain: development of anomalies of, 29; developmental neuropathy in dyslexic, 25, 26; maternal antibodies in fetal, 31. *See also* Left hemisphere
 Bransford, J. D., 99
 British Ability Scale (BAS), 196, 204
 Brown, A. L., 204
 Bryant, P. E., 64, 65
 Bursuck, W., 121
 Calculators: with graphing capabilities, 45; for problem solving, 44
 Canadian Test of Basic Skills, 196, 204
 Cerebrocortical microdysgenesis: in dyslexic brains, 26; models for dyslexic, 33
 Childhood learning problems, failure to develop sublimations and, 114
 Cicci, Regina: presentation of Orton Award for 1989 to, ix-xii; response by, xii-xviii
 Classification: definition of, 98; instructional program based on skills in, 99-101, 104
 Classrooms: emotional climate of, 12; integration of technology in, 41
 Coarticulation, 59, 60
 Code Emphasis approach to reading instruction, 52-62, 71-72; guiding premise of, 63
 Coding mechanisms, word recognition skill and phonological and orthographic, 182
 Cognitive abilities study of gender differences of reading disabled and control twins: methods, 217-19; results, 219, 220, 221-28
 College admissions screening, 131-34
 College entrance examination, predicting college success and, 125-27

- College freshmen: grade point average (gpa) correlation with ACT scores, 122; with at least one disability, 120
- College students with learning disabilities: college performance of, 127-28; comparison of graduates and non-graduates, 131-34; effectiveness of program to assist, 130; factors related to academic success of, 135; grade point average (gpa) and prediction of college success among, 124-25; graduation and academic failure rates of, 128-31; high school performance of, 124-25; intervention effectiveness with, 128; learning disability diagnosis verification and, 123; program to assist, 120; study of factors related to success and failure of, 122-34
- Colorado Reading Project, 217
- Communication among non-human animals, 56-57
- Compact disc technology, 48-49
- Computer-assisted instruction, teacher involvement in, 42
- Computers: software selection for, 41-42, 47; software types and, 42-44
- Concentration, gifted dyslexics intellectual, 9
- Concepts, rapid grasp of, 8
- Congenital heart block in infants, autoimmune disease in mother and, 31
- Content areas: relating to other content areas, 105; writing and reading and teaching in, 103
- Contextual analysis, resistance to, 113
- Contextual cues, 194
- Cordoni, B. K., 122
- Creativity, 50; nurturing, 11-13
- Crohn's disease, 20, 23-24
- Cross, D. R., 204
- Curiosity of gifted dyslexic students, 9
- Curriculum, dyslexics and the, 13-15
- Curriculum and Evaluation Standards for School Mathematics, 44
- Curriculum standards, technology for problem solving and, 44-45
- Curtis, M. E., 195
- Databases as instructional support systems, 45-46
- DeCani, J. S., 103
- Decoding skill, students with poor, 87
- Defense mechanisms, 110
- DeFries, J. C., 217
- Depression, denial of, 110
- Developmental lag hypothesis, 182
- Diabetes, handedness and, 23
- Dichotomous keys, 100, 101, 102
- Disabled post-secondary students, 120.
See also College students with learning disability (LD)
- Disabled spellers, 140-42; discriminating between normal and, 145-47; research project on, 141-44
- Divergent thinking, 10
- Drill and practice: computer-based, 42; inappropriate use of, 43
- Dyslexia: attempt to delineate precursors of, 154-65; definitions of and criteria for, 153; emotional problems secondary to, 107-108, 109; handedness and systemic lupus erythematosus and, 24-25; male-female ratio and, 25; measures used to predict, 155-58; neonatal systemic lupus erythematosus and, 27-28; neuropsychological approach to, 181; passed through maternal line, 24; possible comprehensive brain systems underlying, 167; prediction of, 159-61, 165-67; as several syndromes, 181; sublimation and, 114. *See also* Reading disability (RD)
- Dyslexics: allergic and autoimmune diseases among, 25; behavioral heterogeneity among, 181; comparison of normal kindergarten boys with, 161, 163-64; identification of, 158-59; impaired phonological processing as primary source of reading difficulty among, 182; study of familial resemblance among, 183-90; three groups of, 7-8; traits that may indicate exceptional talent in, 8-10, 15. *See also* Gifted dyslexic students
- Dyslexic students: creativity and intellectual power and, 5-6; hallmarks of high potential in, 8-10, 15; providing opportunities for talents of, 16-17

- Edinburgh Handedness Inventory, 20, 24
- Educational remediation, mutual reinforcement of psychotherapy with, 108
- Electrophysiological measures, 157, 164, 165
- Emotional problems secondary to dyslexia or learning problems, 107-108, 109
- Empathy in gifted dyslexics, 9-10
- English courses, college success of learning-disabled students and, 131, 132, 134
- Error analysis by students, 102
- Erythroblastosis fetalis, 33
- Factual knowledge, use of, 15
- Factually correct answers, divergent thinkers and, 10
- Febrile convulsions in male infants, 32
- Females: dyslexic families with autoimmune diseases and scarcity of, 28; increased susceptibility to autoimmune disease in, 32
- Fine-grained auditory discrimination, 171; improving, 178; task, 173-75
- Finger location test, 155, 159, 160, 161, 164, 165, 166, 167
